<b>Date:</b> May 2018	<b>TOPIC TITLE:</b> CCHMC Pediatric Bags	<b>Total Pages: 1</b>
<b>Section #: 6</b>		<b>Topic #: 10</b>

**TOPIC # 10: Cincinnati Children's Hospital Medical Center (CCHMC) Pediatric Bags**

**Description:**

CCHMC Statline provides CFD and other agencies pre-packed bags for responding and treating pediatric patients encountered on emergency responses. The bags are issued on a 1-for-1 basis at CCHMC in the Statline offices attached to the emergency department. Bags are individually numbered and sealed when issued.

**Features:**

Bags contain all necessary tools and adjuncts to treat an array of pediatric emergencies. At this publication date, drugs are NO LONGER INCLUDED in the bag itself and must be provided by CFD. Bags are modularized inside and contain content cards to aid providers in locations of equipment.

**Directions:**

Members should refer to Southwest Ohio Protocol and operate under the scope of practice for EMT/Paramedic. It is ENCOURAGED for members to break seals on this bag and be familiar with contents and locations of equipment. Drilling on common emergencies that would require utilization of the bag/contents should be drilled on accordingly. Bags that have been opened DURING AN EMERGENCY RESPONSE or are expired may be replaced by CCHMC and ALS Supervisors. ALS Supervisors should be advised when bags have been switched and advised of the OLD AND NEW bag numbers. This is for accountability reasons and to allow for department wide tracking of the bags and subsequent locations. Any concerns of damage or missing components should be reported to an ALS Supervisor and company officer immediately so replacement can be organized.
