Section #: 5	Milwaukee Portable 18v Hydrant Pump	Topic #: 26

TOPIC #26 Milwaukee Portable Hydrant Pump

As gasoline powered hydrant pumps get replaced, Fire Companies will be issued a battery powered Hydrant Pump. Please follow these guidelines.

- Used 18v Milwaukee Battery
- To be used to pump water only. Don't use to pump flammable or combustible liquids.
- Try to avoid pumping water with silt or debris.
- Pump is self-priming
- Will lift a distance of 18', so will pump all hydrants barrels
- The pump should recognize its not pumping water and shut down; however, if this doesn't work – **DO NOT** run the pump dry for more than 10 seconds.
- Remove the battery before servicing or maintaining the pump.
- *See Section 5, Topic 25 – Milwaukee Portable Batteries for battery charging and maintenance.*

FUNCTIONAL DESCRIPTION

1. Outlet
2. Direction of flow indicator
3. Handle
4. Battery compartment button
5. Battery compartment
6. On/Off button
7. Inlet
